DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 to 5, drawn to a method of making a sintered rare earth-iron magnet, classified in class 148, subclass 103.
 - II. Claim 6, drawn to a compacting device including means for applying a pulsed magnetic field, classified in class 425, subclass 3.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as compacting any magnetic or non-magnetic material including ferrites, ceramics, etc.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different and because the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
